## MISSION

To provide timely and reliable national statistical information on the labour market to facilitate informed decision-making within the government and community-at-large

Statistical activities conducted by the Manpower Research and Statistics Department (MRSD) are governed by the provisions of the Statistics Act (Chapter 317). The Act guarantees the confidentiality of information collected from individuals and companies. It spells out the legislative authority and responsibility of the Director, Manpower Research and Statistics Department.

Statistics compiled and disseminated by the MRSD adhere to international standards on official statistics set by the International Labour Organisation and International Monetary Fund.

MVC	:	Monthly Variable Component
NRAF	:	Non Rank-and-File
RAF	:	Rank-and-File

## **Executive Summary**

The wage situation improved in 2021 compared to 2020. Both nominal and real wage growth were higher in 2021 than in 2020.

Wages are expected to continue to grow in 2022, as the labour market is expected to remain tight, and firms compete for workers. However, supply chain disruptions and uncertainty arising from the prolonged Russia-Ukraine conflict could affect business confidence and slow the rate of growth. With recent shocks to the global supply chains, inflation is projected to stay elevated and dampen real wage growth.

Summary of findings:

Amid strong economic recovery in 2021, the proportion of profitable establishments rose to 75%.

Nominal wages of full-time employees who were in employment for at least a year or more rose over the year by 3.9%. This was double the wage growth of 2020, and comparable to the growth in 2019.

Nonetheless, nominal wage growth in 2021 was lower than that seen in 2010 (5.7%), during the post-Global Financial Crisis recovery. This is reflective of the uneven recovery across sectors. In addition, some establishments may have been more cautious in raising wages given the greater uncertainty caused by the pandemic.

Despite rising prices, nominal wage growth still more than kept pace with inflation, allowing real wages to grow, but at a considerably slower pace of 1.6%.

In 2021, all sectors experienced higher nominal total wage growth compared to 2020. The magnitude of wage change was varied across sectors as some sectors have not fully recovered from the impact of the pandemic. Sectors such as *Information and Communications* (total wage change of 5.1%), *Financial and Insurance Services* (4.1%) and *Manufacturing* (4.0%), continued to see strong wage increases in 2021.

Sectors that were severely affected by the pandemic also recovered to register wage increases including *Accommodation* (1.7%), *Transportation & Storage* (2.8%) and *Food & Beverages Services* (2.6%). However, the increases were generally lower than their prepandemic growth rates.

## 1 Introduction

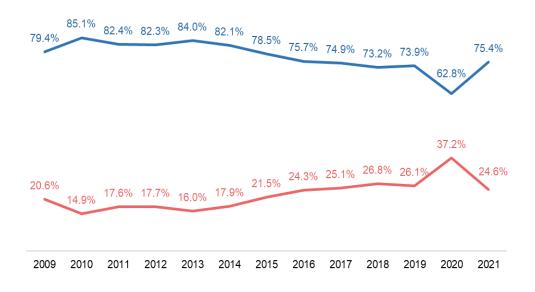

1.1 The data presented in this Report are obtained from MOM's Annual Wage Change (AWC) survey on private sector establishments. The survey captures information on wage changes of full-time resident employees in continuous employment for at least a year. This removes the effects due to compositional changes – such as job change, new entrants – and focuses on the wage experience of the majority of employees in the workforce<sup>1</sup>. The survey coverage and methodology are explained in Annex 2.

## 2 Key Findings

## Profitable Establishments

2.1 Amid strong economic recovery in 2021, the proportion of profitable establishments increased from 63% in 2020 to 75% in 2021 (Chart 1). The proportion of profitable establishments rose across most sectors<sup>2</sup>.

## Chart 1: Proportion of Profitability Establishments, 2009-2021

Note: Based on private sector establishments that disclosed their profit status.

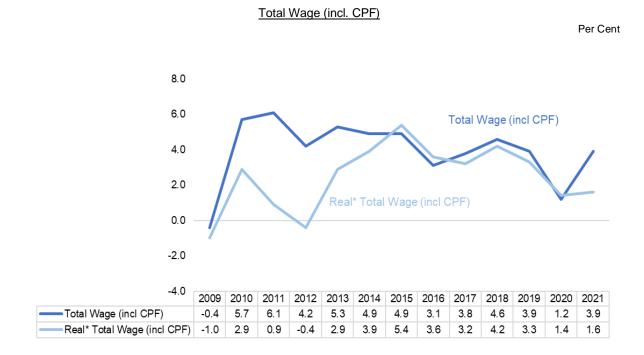

<sup>&</sup>lt;sup>1</sup> Based on the 2021 Report on Labour Force, about 80% of employees in the workforce were in their jobs for one year or more

<sup>&</sup>lt;sup>2</sup> The only exception was Real Estate Services (2020: 82%, 2021: 70%)

2.2 Nominal wages of resident employees rose by 3.9% in 2021 (Chart 2). This increase is more than double the decade low of 1.2% in 2020, and within the range of the pre-COVID years of 2018-2019 (3.9% to 4.6%).

2.3 Wage growth in 2021 was lower than that seen in 2010 (5.7%), during the post-Global Financial Crisis recovery. This is reflective of the uneven recovery across sectors. In addition, some establishments may have been more cautious in raising wages given the greater uncertainty brough about by the pandemic. As COVID-19 had a less severe impact on wages compared to the GFC<sup>3</sup>, wage growth also had less ground to recover in 2021 compared to 2010.

2.4 While prices have risen, nominal wage growth more than kept pace with inflation, allowing real wages to grow. However, the pace of growth was considerably dampened. The real wage growth of 1.6% was only slightly above that of 2020 (1.4%) and lower than 2019 (3.3%).

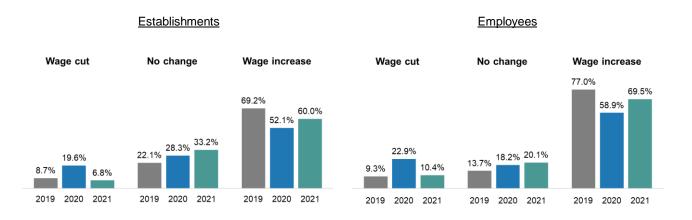

## Chart 2: Annual Change in Total Wages, 2009-2021

2.5 More establishments gave wage increases in 2021 (60%) compared to 2020 (52%) (Chart 3). However, the proportion was still lower than in 2019 (69%). This suggests that with the uneven recovery in 2021, some establishments were slower in picking up from the impact of the pandemic. Establishments that gave wage cuts remained the minority at 6.8%. The remainder (33%) left wages of their employees unchanged.

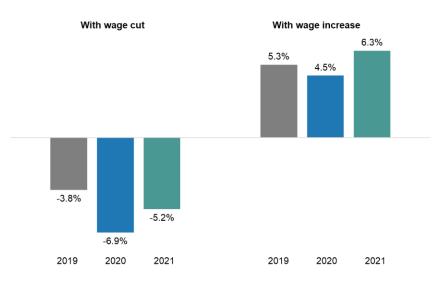

2.6 A similar observation was made for wage change among employees.

<sup>&</sup>lt;sup>3</sup> Nominal wages declined in 2009 (-0.9%), while wages continued to grow, albeit more slowly, in 2020 (1.2%).

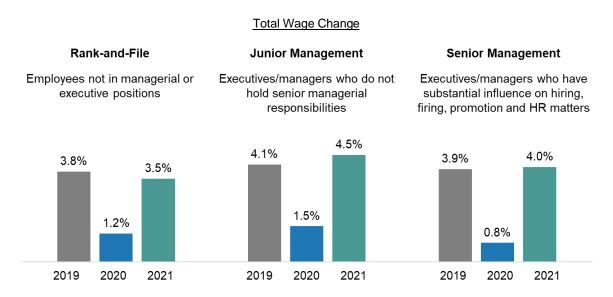

2.7 Among establishments that gave wage increases, the magnitude of increase was higher in 2021 compared to 2020 and pre-pandemic 2019 (Chart 4). Among establishments which gave wage cuts, the magnitude of wage cuts was less steep in 2021 than in 2020. However, the cuts were still higher than in 2019. This is again reflective of the uneven recovery across sectors.

## Chart 4: Extent of Total Wage Change Among Establishments, 2019-2021

## Wage Change by Employee Type

2.8 Rank-and file (RAF), junior management and senior management employees all experienced higher wage growth compared to 2020 (Chart 5).

## Chart 5: Wage Change By Type Of Employees, 2019-2021

## Wage Change by Sector

2.9 In 2021, all sectors experienced higher total wage growth compared to 2020 (Chart 6). The magnitude of wage change was varied across sectors as some sectors have not fully recovered from the impact of the pandemic.

2.10 In particular, *Information and Communications* (total wage change of 5.1%), *Financial and Insurance Services* (4.1%) and *Manufacturing* (4.0%), continued to see strong wage increases in 2021. These sectors were less affected by the pandemic and have been seeing sustained GDP growth since late 2020. Wage growth for *Information and Communications* and *Manufacturing* was also higher than pre-pandemic rates in 2019.

2.11 Sectors that were severely affected by the pandemic also recovered to register wage increases – *Accommodation* (2020: -5.3%, 2021: 1.7%), *Transportation & Storage* (2020: -3.0%, 2021: 2.8%), *Food & Beverages Services* (2020: 1.5%, 2021: 2.6%). However, the increases were generally lower than growth sectors and pre-pandemic growth rates. With further easing of domestic safe management measures and border restrictions, wages in these sectors are expected to pick up in 2022.

	Chart 0. Total Wage Char		, 2015-2021

## Chart 6: Total Wage Change by sector (%), 2019-2021

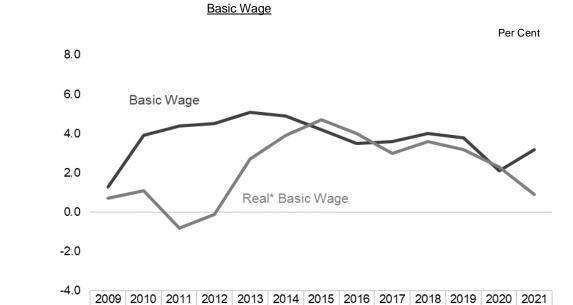

## **Conclusion**

Wages are expected to continue to grow in 2022, as the labour market is expected to remain tight, and firms compete for workers. However, supply chain disruptions and uncertainty arising from the prolonged Russia-Ukraine conflict could affect business confidence and slow the rate of growth. With recent shocks to the global supply chains, inflation is projected to stay elevated and dampen real wage growth.

# SURVEY COVERAGE AND METHODOLOGY

## SURVEY ON ANNUAL WAGE CHANGES, 2021

## Introduction

The Survey on Annual Wage Changes, 2021 was conducted by the Manpower Research and Statistics Department of the Ministry of Manpower under the Statistics Act (Chapter 317). The survey fieldwork was conducted from 7 February 2022 to 14 April 2022.

## **Objective**

The survey was conducted to obtain information on the extent of wage changes in 2021.

## Coverage

The survey covered private sector establishments with at least 10 employees. Some 5,199 private establishments responded to the survey. These establishments employed 1,077,400 employees which included 561,700 resident full-time employees on the Central Provident Fund (CPF) scheme with at least 1 year in service (comprising 251,400 rank-and-file employees, 211,200 junior and 99,100 senior management staff) and 334,400 non-resident employees. Resident full-time employees with less than a year of service, or on part-time formed the remaining 181,200. The survey response rate was 84%.

The results were weighted to reflect the population of private sector establishments with at least 10 employees by using expansion factors based on sampling fraction.

#### Methodology

The survey was conducted using online questionnaires. Respondents could submit their returns online, with clarifications made over the phone.

## **Reference Period**

The reference period for the survey was from November 2020 to November 2021.

## **Data Collected**

The establishments were asked to provide information on the average basic wage change, Annual Wage Supplement (AWS) and Variable Bonus (VB) to employees in 2021. The information collected pertains to full-time employees on the CPF scheme who had been with the establishment for at least one year as at 30 November 2021.

## Analysis

Findings on the extent of wage changes in private sector in 2021 is based on private establishments with at least 10 employees. Unless otherwise stated, all data on annual variable component are based on data collected in the reference year.

## Classification

The industries of the surveyed establishments were classified according to the Singapore Standard Industrial Classification (SSIC) 2020.

## **Reliability of Data**

In a sample survey, inferences about the target population are drawn from the data collected from the sample. Errors due to extension of the conclusions based on one sample to the entire population are known as sampling errors. The sampling error of an estimate is the extent of variation between the estimated value obtained from a sample and the true value from the population. Factors influencing the sampling error include the sample size, the sample design, method of estimation, the variability of the population and the characteristics studied.

A common measure of the sampling error of an estimate is its standard error, which is a measure of the variation among the estimates derived from all possible samples. An alternative measure is the relative standard error of an estimate which indicates the standard error relative to the magnitude of the estimate. A sample estimate and an estimate of its standard error can be used to construct an interval that will, at specified levels of confidence, include the true value. By statistical convention, the confidence level has been set at 95 per cent.

Estimates of the sampling variability of selected indicators are as follows:

	Estimate	Standard Error	Relative Standard	95% Confidence Interval		
		Enor	Error (%)	Lower	Upper	
Total Wage Change (Incl employer CPF) <sup>^</sup>	3.9%	0.06%-pt	1.6%	3.8%	4.0%	
Total Wage Change (Excl employer CPF) <sup>^</sup>	3.9%	0.06%-pt	1.6%	3.8%	4.0%	
Basic Wage Change <sup>^</sup>	3.2%	0.04%-pt	1.3%	3.1%	3.3%	
Variable Component <sup>A</sup> (months of basic wage)	1.84	0.01	0.67%	1.81	1.86	

#### Notes:

(1) ^ Wage growth pertains to wage increases granted by private sector establishments (with at least 10 employees) to full-time employees on CPF Scheme who were in continuous employment for at least a year.

(2) \* Quantum of basic wage increase is available. Data includes establishments that had given other forms of basic wage increase.

## **Concepts and Definitions**

Total number of paid employees:	This refers to the number of persons, both local and foreign, working <u>directly</u> for the establishment, including employees who on this day are on sick leave, annual leave, etc. but are still on the establishment's payroll. These permanent and/or temporary employees can work on a full-time or part-time basis. It includes piece-rated workers but excludes workers who work 'on and off' (e.g. exhibition and convention workers hired especially for an event for short durations (say $3 - 5$ days)).
Local employees:	This refers to Singapore Citizens and Permanent Residents.
Rank-and-File Employees:	This includes employees who are in technical, clerical, sales, service, production, transport, cleaning and related positions. They are not employees in managerial or executive positions.
Junior Management Staff:	This refers to executives and managers who do not hold senior managerial responsibilities. They do not have substantial influence over hiring, firing, promotion, transfer, reward or discipline of employees.
Senior Management Staff:	This refers to executives and managers who have substantial influence over hiring, firing, promotion, transfer, reward or discipline of employees.
Basic Wage:	This refers to the total basic pay before deduction of the employees' CPF contributions and personal income tax. It excludes employers' CPF contributions, bonuses, overtime payments, commissions, allowances (e.g. shift, food, housing and transport), other monetary payments and payments-in-kind.
Basic Wage Adjustment:	This usually comprises wage adjustments and built-in increments such as annual (or service), merit and NWC increments. Promotional increments are excluded.

Annual Wage Supplement (AWS):	This refers to the annual payment usually made at year-end and is commonly known as the 13th month allowance.
Variable Bonus (VB):	This refers to the payment given in addition to the AWS. It includes incentive payments and 'ang pows', but excludes AWS. The variable bonus is usually linked to establishment and/or individual performance and may vary from year to year. It may be paid in a lump sum or divided into several payments over the year; in which case the several payments should be added together.
Annual Variable Component:	This usually consists of 2 components i.e. AWS, and VB. Generally, the annual variable component is linked to establishment's profitability.
Monthly Variable Component (MVC):	This refers to the component of monthly basic wage that can be adjusted easily and quickly to meet changing business conditions. It should attract CPF, overtime pay, allowances, etc. The MVC can be built-up through wage increase or 'hived-off' from basic wage. Establishments can also implement a cut in basic wage by reducing MVC.
Market Conditions:	This can refer to a country's economic performance, industry's and/or transnational organisation's performance (in the case of multinational corporation).
Government Support Programmes	Government Support Programmes such as the Job Support Scheme provides wage support to employers to help them retain their local employees (Singapore Citizens and Permanent Residents) during this period of economic uncertainty. JSS payouts are intended to offset local employees' wages and help protect their jobs.

## Formulae

=

• Basic Wage Change in 2021

End 2021 Basic Wage – End 2020 Basic Wage

———— x 100%

End 2020 Basic Wage

• Total Wage Change in 2021

2021 Total Wage – 2020 Total Wage

= \_\_\_\_\_ x 100%

2020 Total Wage

where

Total Wage = Annual Basic Wage + Annual Variable Component (i.e. Annual Wage Supplement and Variable Bonus)

## FEEDBACK FORM

## Report Title: Report on Wage Practices 2021

1.	How would you rate this report in terms of :	<b>F</b> usselland	Qaad	<b>A</b>	Deer	
	a) Relevance to your work	Excellent		Average	Poor	
	b) Providing useful insights on prevailing					
	labour market trends/development					
	c) Ease of understanding					
2.	Which area(s) of the report do you find most use	ful? Please	provide	reasons.		
3.	How do you find the length of the report?		Too briet			
		Excellent	Good	Average	Poor	
4.	Overall, how would you rate this report?					
6.	Any other comments or suggestions you wish to	bring to our	attention	?		
	Thank you for your v	aluable fee	edback
