

AUTO BENCHMARK

What is AutoBenchmark?

AutoBenchmark is a free service that allows you to compare your organisation against national or industry norms on wages, employment conditions, and staff turnover through interactive charts pre-populated with your survey responses.

Indicators

The indicators available for benchmarking can be found in regular publications such as the quarterly Labour Market Reports, which are closely monitored by analysts and widely reported in the local media.

Now you may have your organisation's data computed for benchmarking against widely-used indicators such as:

- ✓ Occupational Wage Search
- ✓ Annual Wage Changes & Bonuses
- ✓ Types of Work-life Arrangement
- ✓ Types of Family-friendly Paid Leave
- ✓ Recruitment Rate
- ✓ Resignation Rate
- ✓ Job Vacancy Rate
- ✓ Medical Leave (Outpatient/Hospitalisation)

FEATURES

AutoBenchmark comes with dynamic text and visualisation features that will make understanding your benchmarking results easier.

Dynamic Text

Our Dynamic text feature explains your benchmarking results simply and succinctly

Chart

Presenting your data against your benchmark group visually in simple-to-understand charts

Benchmark Selection

Refine your benchmark criteria with a few simple clicks. Choose to compare against organisations from different industries and establishment sizes

Calculator

And if you are not selected for the latest round of our survey, our "Input Data" feature helps you with the computations

Access Rights

Appoint authorised users to view your organisation's benchmarking results. Your organisation may authorise up to a maximum of two administrators and three users
